

FAIL NOT™ HARDWARE SYSTEM

Fence Quarter's FAIL NOT™ Hardware is engineered to make your deck railing Wood Infill Stronger than ever before

Made out of durable Recycled Carbon Fiber, the FAIL NOT™ offers these advantages:

- Hidden
- Allows for repeated removal for maintenance or changing to a different Fence Quarter Insert Design without the integrity loss of tight fitting screws into just wood
- Piece of mind that your Deck or Porch Railing will withstand someone accidentally falling into your Railing without getting seriously hurt*
- Intended for deck heights that are dangerous and where peoples safety is a number one priority
- Will not melt or crack in extreme temperatures in some regions of the country
- The Patent Pending Hardware was designed with a high degree of Shear Resistance
- Code Compliant exceeding building codes by more than 10 times over**

All Screws Supplied with Every Purchase
