

FN-T12 and FN-T13

The Counter Bore Drill Set is specifically designed to use with the Positional Tool (FN-T3) for the installation of the Fence Quarter's FAIL NOT™ Hardware System.

1. Bore Drill Bit (FN-T12) is designed for the Counter Bore Drill Housing. The flattened end to only produce the exact cavity into your rail frame.
2. FN-T13's flat surface acts as an exact depth guide for the Lock Down Screw Mount Hardware. It is chamfered to assist in managing wood shavings while drilling.
3. Knurled surface for stable holding.
4. Twin ball barring set for accuracy.
5. Lock down set screw to drill bit in place.
6. Flattened Shank for no spin while in the drill.
7. Through hole at the end of shanks for assistance pushing out the drill bit.
