

# MEASURE NOT™ SYSTEM

**Fence Quarter's MEASURE NOT™ SYSTEM helps you get the most accurate measurements without a tape measure.**

- There is a MEASURE NOT for both your decks and stairs
- Deck = 30.5", 31.5", 32" and Stairs = 7/11/32.5 (7" Riser, 11" Tread, 32.5 Degrees)\*
- Our Deck Railing Inserts will fit perfectly into the opening using the 30.5" size.

Simply butt one **MEASURE NOT™** to the underside of the attached Main Rail and clamp to each post in the Infill Section

### **Clamps not included**

No Tape Measure needed, the **MEASURE NOT™** will give you a perfect 30.5 separation between your Main Rails. Add the 2 x stock at 3" plus a 2.5 space from the deck surface to the underside of the Lower Mail Rail and you have a 36" Height Deck Railing

Then butt the Lower Main Rail to the underside of the **MEASURE NOT™** and attach each end to your post

**MEASURE NOT™** is included with orders of \$400 or more. The **MEASURE NOT™**, clamps and other tools are available for purchase on our website [fencequarter.com](http://fencequarter.com)

\*Additional information about sizing can be found in resources section on the [Fence Quarter website](http://Fence Quarter website)
